Summary

I am a B.Tech. graduate in Information Technology with hands-on experience in the MERN stack development through academic and personal projects. I enjoy building responsive, scalable, and user-friendly applications, and I'm continuously learning new technologies to improve my skills. As a web developer, I work across both front-end and back-end development. I specialize in creating modern applications using technologies like React, Tailwind CSS, Node.js, Express.js, and MongoDB. I'm currently looking for opportunities where I can learn more, gain real-world experience, and continue growing my career in web development.

Academic Projects

Instagram Clone [Link]   06/2025 - 07/2025

Instagram Clone (MERN Stack)

- Built a full-featured social media platform that looks like Instagram with secure authentication (login, signup, reset password, and account management).
- Implemented core social features including profile management, post creation and deletion, likes, comments, and follow/unfollow functionality.
- This project helped me improve my full-stack development skills and understand how social networking applications work.

Technical Skills

- **Programming Languages**: C, Java, JavaScript
- **Web Development**: HTML, CSS, JavaScript, Tailwind CSS, React.js, Redux, Node.js, Express.js
- **Database**: MongoDB, MySQL
- **Others**: Git, GitHub, Postman, VS Code, Data Structure and Algorithm, Object-Oriented Programming

Education

Chaudhary Charan Singh University, Meerut   2022 - 2026

Bachelor of Technology – Information Technology
